

Tesla Hloubětín

ABOUT THIS PROJECT:		
Market Segment: General Construction	Investor: Central Group a.s.	Products Used: Xypex Admix C-1000NF
Location: Prague, Czech Republic		

The Tesla Hloubětín multifunctional complex, which situated in the rapidly expanding neighborhood of Prague, is a versatile haven of amenities. Conveniently located near tram stops on Poděbradská Street and a mere 3-minute journey from the metro B - Hloubětín station, it offers accessibility and connectivity.

Designed to cater to diverse lifestyles, Tesla Hloubětín offers compact apartments, making them an ideal choice for singles or a lucrative investment opportunity, as well as spacious family apartments featuring large terraces that offer stunning views of Prague.

The underground structure was waterproofed with Xypex. Nekap was responsible for the waterproofing of the underground structure, which included the use of 24,000 kg of Xypex Admix C-1000 NF and Manorteq Static Waterbars as part of the waterproofing system, along with waterproofing joints, penetrations, and other details. Nekap provided a full waterproofing guarantee for the substructure.
