Water Treatment Plants
Water Holding Structures

Engineering:
SANACE

Products Used:
Xypex Concentrate
Xypex Modified

Location:
Prague, Czech Republic

Contractors:
ABV s.r.o. Praha 9

The ČS. Spořitelna project in Prague, Czech Republic, aimed to refurbish a drinking water reservoir. Completed in 1995, the project involved a two-layer waterproofing system by applying Xypex Concentrate and Xypex Modified to the 60 m² concrete surfaces of the tank. The project, led by SANACE and executed by ABV s.r.o. Praha 9, successfully sealed all joints and openings and eliminated all leaks.
