

Bridge, Prague Castle

ABOUT THIS PROJECT:

Market Segment:
Bridges

Contractors:
ABV s.r.o. Praha 9

Products Used:
Xypex Concentrate
Xypex Modified
Xypex Patch'n Plug

Location:
Prague, Czech Republic

Completed in 1995, the restoration of the Bridge at Prague Castle in Prague, Czech Republic, focused on finding a solution to address the waterproofing challenges and seepage into the masonry of the bridge structure.

The contracting company responsible for the work was ABV s.r.o. Praha 9. Xypex Concentrate, Xypex Modified, and Xypex Patch'n Plug were selected to waterproof the ancient masonry. These Xypex products provided the project with a permanent waterproofing solution, playing a crucial role in enhancing the waterproofing capabilities of the bridge and contributing to its preservation and longevity amidst its high-profile location.
