

## Industrial Building

*Kopavogur, Iceland*

Completion Date  
**NOVEMBER 2016**

Owner  
**BOEING CORPORATION**

Contractor  
**SKANSKA USA**

Products  
**ADMIX C-500**

Project Type  
**GENERAL CONSTRUCTION -  
FOUNDATION**

This roof top parking area was constructed in 2003 with an 8 cm topping over precast panels. Xypex was chosen as the only water-proofing method for this project. Xypex [Admix C-1000 NF](#) was used at a 1.5% dosage rate. Directly after construction there was an area with minor leakage but this was fixed with an application of Xypex [Concentrate](#). This project was visited in spring 2017 and it has remained dry since it was built.
